

Technical Bulletin 003**Quantum Windows Continued Product Improvement****Eurocell PAS24 Specifications**

As part of our ongoing commitment to ensure we meet the latest test standards with regards to PAS24 compliance along with providing the best possible solutions, Quantum Windows has undertaken a range of PAS24 tests on both Eurocell Eurologik and Eurocell Modus casement windows.

All testing has been carried out with both double and triple glazed beads enabling us to not only meet but exceed current building standards. We have also undertaken testing with both standard and egress hinges along with their respective restricted equivalents.

Eurocell Eurologik Casement

Side Hung Windows
(939mm wide mullion break x 1470mm high)

Top Hung Windows
(1470mm wide x 1470mm high)

Floating Mullion French Windows
(1400mm wide x 1470mm high)

Eurocell Modus Casement

Side Hung Windows
(939mm wide mullion break x 1470mm high)

Top Hung Windows
(1470mm wide x 1470mm high)

Floating Mullion French Windows
(1400mm wide x 1470mm high)

All sizes shown are those tested however depending on the system limitations there may be slight restrictions on these.

We have used a recognised range of hardware produced by Nico Hardware.

Locks: Nico PASEspag (French Window has 1 x Nico Shootbolt for the slave)

Hinges: Nico Standard or Nico Atlas Egress (plus restricted variants) along with Nico Xtra bolts

All parts have been added to the Window Designer software and Quantum Windows will be supplying this new specification as standard for any orders placed from Monday 10th March 2025.
